

- *Industrial visit to TALROP*
- *Python-Add on course*
- *Training with TEGAIN TALROP*
- *BEACH HACK 4*

VISION

Creating socially committed engineers with professional competency and excellence in Computer Science and Engineering through quality education.

MISSION

1. To achieve technical proficiency by adopting effective teaching-learning strategies which promote innovation and professional expertise.
2. To facilitate skill development of students through additional training by collaborating with industry to broaden their knowledge.
3. To promote excellence in research, development and consultancy services rooted in ethics, in order to emerge as responsible engineers.

INDUSTRIAL VISIT TO TALROP

S3 CSE Students had a visit on 24th February 2022 to Talrop, an IT Company which runs inside our Campus. They had a session on how to become an entrepreneur which would help students to mould their future with the help of opportunities in Technology. Moreover, the students had an opportunity to attain a basic knowledge

about an IT company, its infrastructure and its working environment. Ms. Sreelakshmy MK, Ms. Hima Jose, and Ms. Iris Jose, all Assistant Professors in the CSE Department, organized the program.

PYTHON-ADD ON COURSE

On 24 May 2022, the Community of Developers (CODE) at Christ College of Engineering conducted an add-on course on Python exclusively for S2 CSE students. The event was coordinated by Ms. Iris Jose, Assistant Professor CSE Department. The course aimed to provide S2 CSE students with a deeper understanding of Python, one of the most popular programming languages in the world. The course was highly interactive, with the students actively participating in the learning process. The participants were able to implement their learnings with ease and were provided with constant support and feedback from the facilitator.

TRAINING WITH TEGAIN TALROP

The Department of Computer Science and Engineering at CCE hosted a five-day training program in Web Development, in partnership with Tegain, an initiative from Talrop. The training program was a huge success, thanks to the efforts of Tegain members who shared their expertise and knowledge with the participating students.

The training program was aimed at equipping the students with valuable skills and knowledge in the field of web development. Throughout the five days, the students were exposed to various aspects of web development, including web design, programming languages, and database management

BEACH HACK 4

BEACH HACK is a 24-hour hackathon, which bring computer programmers and software developers to collaborate and find an innovative solution to some of the problems we face in our society, and simultaneously improve their critical and creative thinking. **BEACH HACK 4**, the much-awaited 4th season of **BEACH HACK** was planned to be held on 20th and 21st of May 2022 on the shores of Azhikode beach, Kodungallur. Unfortunately, due to the bad weather we conducted the program in online mode this year. The prize distribution of the event was conducted at college and Fr. John Paliakara congratulated the winners.
